

# DEVELOPING TRAINING MATERIALS IN MHPSS

Dawood Darman  
PSS Trainer  
Action Against Hunger in Afghanistan

## SUMMARY

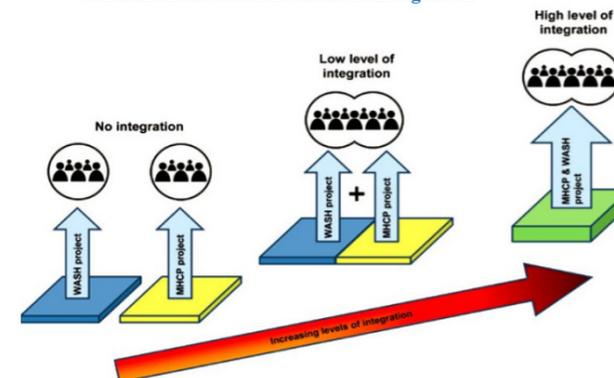

In Action Against Hunger's base in Helmand, Afghanistan, there was a gap in knowledge amongst some of the staff members on Mental Health and Psychosocial Support (MHPSS) and the integration between this sector and the Water, Sanitation and Hygiene (WASH) sector. Dawood developed two standardised presentations that can be used to train staff on these subjects at any time, in a consistent manner.

Different Levels of Multi Sectorial Integration

## LEARNING

Upon learning about some of the shortcomings in specific knowledge about integration between the MHPSS and WASH sectors, these thoroughly detailed presentations were developed. These presentations not only serve as training materials, but also to determine which staff members need more specific training in these subjects.

To make the presentations as integrated and accessible as possible, they were translated into the local language of Pashto. In order to ease the learning process and standardise it further, the presentations were designed to be especially thorough, including notes, suggestions for exercises and other technical inputs for the facilitator or presenter to fall back on while giving the training.
